RE: Letter of Purpose

Dear Dr. Finfrock,

After these many months of working so closely together, we thought it time to once again make known our commitment to your company and your project. As your joint venture partner, we at The Gifts of Firstfruits Foundation, Inc. (GFFF) remain totally focused and dedicated to our commitment as your funding arm to provide all the necessary funds for your project, namely the Detroit to Ann Arbor 88 mile program as well as all other projects in the United States and abroad.

We believe the Interstate Traveler High-Speed Maglev Transportation System with its integrated self sufficient power generation and distribution network will not only revolutionize they way people travel but will redefine electrical generation for our country. This huge undertaking would not be possible if it were not for the tremendous leadership and technical team your company has assembled. These are but a few of the things that attracted us to you.

As you know, we at GFFF are heavily engaged in our own project called Liberty Village. Liberty Village has been designed with the goal of effectively equipping families to move forward toward independent economic self-sufficiency through didactic instruction in: family counseling; job readiness training; family and children services; voter education; money management; and technology proficiency. The proposed plan is for GFFF to build affordable homes along the route of the Interstate Traveler and perimeter that allows moderate to low income families the opportunity of home ownership. Additionally, businesses, hospitals, schools, would be constructed into a totally self sufficient community where in the residents are employed within the community. These Liberty Villages will house 20 to 30 thousand people. The goal is having at least one in every state.

The integration with the Interstate Traveler and its ability to create electrical power, water, and to distribute sewer, and other municipal fuels create a synergy that is unmatched anywhere else in the world.

We once again want thank you for your patience, faith and trust. While this is easily the largest undertaking the world has ever seen, it is well within Gods ability to deliver.

We remain faithful to that end.

Sincerely,

Michael Dortch
